Questionnaire:

1. What do you love most about Coralville?

There is a real sense of community here. Neighbors looking after neighbors. I don't think the people of Coralville realize how special that is, but after living in St. Louis, MO I certainly do!

2. With so many overwhelming issues to address, what would be your primary focus on city council?

I don't want to pigeonhole myself into saying I want to focus primarily on one issue. I would rather address them as needed. During this time of the pandemic we need to be flexible.

3. How will you promote a healthy business environment?

One way would be an improved public transportation system. Currently the hours of operation are somewhat limited, especially on holidays. Many businesses and people operate on non-traditional hours and it puts a heavy burden on those businesses that have employees that rely on public transportation to get to work. Ultimately, I would like to see a highly functioning Corridor wide system that would not only include Coralville and Iowa City but Hills, North Liberty and Tiffin. I believe that a robust public transportation system will allow businesses to thrive by bringing in employees and customers.

4. What motivates you to run for city council?

I have been wanting to be more involved in the community and see the city of Coralville thrive. What better way to help Coralville thrive than being involved in the decisions that shape the community!
